PROFESSIONAL/INTERNSHIP EXPERIENCE

Name of Company: Studo Industry

(May 2023 - August 2023)

Title: Web Development Intern

Duties: Making progress on the web, app and the backend for better user experience and quality.

Name of Company: Terna Engineering College

(Dec 2022 - March 2023)

Title: Software Developer Intern

Duties:

- Developing an app and website from scratch for a political party for public services.
- Maintenance and optimization of hosting services.

Name of Company: Business Web Solutions

(September 2022 - November 2022)

Title: Web Development Intern

Duties:

- The internship consisted of several modules which needed to be completed.
- Based on these modules, tasks were allotted at the end of each module to check on the candidate's performance.

PROJECTS

- **FINAL YEAR PROJECT:**

Title: Crypto Crowdfunding (2023)

Details: Mixed bag of duties focusing on full stack development rather than focusing on a particular part of the project.

- **MINOR PROJECTS:**

Title: RFID Attendance System with Next.js Dashboard (2023)

Details: My duties mainly included handling the website and API for recording attendance. Another part would be to develop the dashboard.

Title: Web3 Starter Kit with Next.js (2023)

Details: My team worked on an open-source project that leveraged blockchain technology with the help of Next.js. We basically provided a starting point to start any project.

Title: Brain Tumor Detection (2022)

Details: The project focuses on machine learning using the Support Vector Machine (SVM) Model to identify whether an MRI image of the brain has a tumor.

Title: E-commerce Platform for Handicapped Equipment (2022)

Details: This project involved many tasks focusing on full-stack development using the MERN Stack.

TECHNICAL PAPER

Journal Name: International Journal of Creative Research Thoughts (IJCRT)

Paper Title: Crypto Crowdfunding using Blockchain

Issue: Volume 12 Issue 4, April 2024

CO-CURRICULAR ACTIVITIES

- Entered various Hackathons like Swamphacks, Smart India Hackathon (SIH) and Hackformers.
- Managed Discord bots written in Python and JavaScript hosted on AWS EC2/Galaxygate VPS with a team.
